

WASHER PUMPS

The washer pump is a device that, working together with the windshield wipers, plays a crucial role in ensuring the safety and comfort while traveling. Its presence is appreciated, especially in winter, when clear visibility is essential.

SRLLine washer pumps are manufactured in a factory that supplies OE (Original Equipment) and aftermarket products to worldwide markets and is certificated IATF 16949:2016. Modern machinery, automated production lines and testing at every stage of production allow us to create a product that is characterized by:

- high efficiency and reliability,
- quiet operation,
- high quality of materials and workmanship.

Each product is tested before leaving the factory, including checks for leak tightness and rotor balance.

Examples of SRLLine washer pumps and their applications:

Polcar No.	Example application
