

COMPRESSOR COMPONENTS

Compressor components, including key elements such as pulley, clutch plate and clutch coil within the compressor clutch are essential parts of the air conditioning compressor. They ensure the proper operation of the air conditioning system, increase the comfort and safety of travel by affecting the driver's response and well-being. By including **compressor components in SRLine brand**, we prioritize the **highest quality** of offered products and our goal is **reliability and failure-free operation of the air conditioning system**. SRLine compressor components are manufactured in a factory that offers products for OE and aftermarket markets worldwide and is IATF 16949:2016 certified.

State-of-the-art CNC machinery, automated production lines, qualified personnel and testing at every stage of production allow us to offer products that are characterized by:

- **high quality of the materials used in production and precision of manufacturing**,
- **perfect fit** – we offer a wide range of clutches compatible with various car models, and our solutions allow for quick and trouble-free installation,
- **high durability and efficiency** – resistance to extreme temperatures and intensive use,

- **efficiency and economy** – lower fuel consumption and greater driving comfort thanks to efficient operation of the air conditioning (lower compressor resistance, which translates into better cooling system performance).

Examples of SRLine air conditioning compressor components

Polcar No.	Example application	OE number
SKK042S	Audi A1 , 10-	1K0820803E
TKK009S	BMW 5 F10/F11, 10-	64529154070
CKK056S	BMw 3 F30/F31,11-	64529154070

SRLine compressor components are presented in the eCar catalog and in the online catalog (www.catalog.polcar.com) under:

[Thermal Systems] ▶ Thermal Systems ▶ AC/Ventilation ▶
▶ A/C compressor clutch coil / ▶ A/C compressor clutch / ▶ Compressor clutch hub
