

## WATER AND OIL CAPS

The expansion tank cap maintains proper pressure in the cooling system, protecting the system from damage and preventing overheating and engine failure. The oil cap ensures secure seal, protects against leaks and contamination, and guarantees proper lubrication during engine operation. SRLine's top-quality **water and oil caps deliver reliable cooling and lubrication**, safeguarding the engine against major failures.

They are manufactured using fully automated machinery by an IATF 16949-certified factory, which guarantees that every SRLine water and oil cap produced:

- **undergoes quality control**, which eliminates manufacturing errors,
- **has pressure resistance compatible with original products**,
- **is characterized by a perfect fit** (dimensions and appearance consistent with OE).

Examples of SRLine water and oil caps along with their applications

Polcar number	OE number	Applications
<b>A2205S</b>	1306J5, 16470YV011	CITRIEN DS5, 11-
<b>A2338S</b>	8E0121321	AUDI A6, 97-
